# SDLC Task-1

Objective: Create a simple use-case diagram for a Library Management System.

A Library Management System is a software that helps manage the daily activities in a library, like issuing books and managing members.

There are two main actors in this system.

- Librarian — Manages book check-out.
- Member — Borrows and returns book.

Main use cases include:

- check out Book — Done by both Librarian and member.
- Return Book — Performed by the Member.
